	Section Instructions	

Section Description: The purpose of the Facility Profile section is to understand the scope of facility operations and determine what questions in other sections of the Tool are applicable to this specific facility. Topics within this section include: • Step Selection • Basic Information • Building Structures • Worker Demographics • Nationalities • Languages • Operating Licenses • Certifications • Production / Operation Information • Subcontractors for Production / Operation

IMPORTANT NOTES: 1) First make your "Step Selection" below. 2) Then complete all questions in the Facility Profile. Certain answers within your Facility Profile (especially within the "Building Structures" and "Worker Demographics" section) will dictate which questions you will see within the Tool. If a question with free text answer (Response Here) is not applicable to you, type "Not Applicable". If a question does not have the answer option that best fits your facility circumstances, please choose the most appropriate or positive answer and use the question under Sub-Section Facility Comments to provide your feedback. You will have to complete one Facility Profile question after you have finished your entire self/joint-assessment to ensure an accurate answer: FP-BAS-26 Date of self/ or joint-assessment submission (YY-MM-DD); Remember that the verification has to occur within two months after this submission date. If scheduling does not allow you to complete the verification in time, then ensure you update this self/joint-assessment prior to completing it on the Accredited Host platform.

Child Labor		
Sub-Section Instructions		
	Overall International Labor Standards Compliance Guidance: Child labor is work that deprives children of their childhood, their potential and their dignity, and that is harmful to physical and mental development. It refers to work that is mentally, physically, socially or morally dangerous and harmful to children and interferes with their schooling by depriving them of the opportunity to attend school, by obliging them to leave school prematurely, or by requiring them to combine school attendance with excessively long and heavy work. In its most extreme forms, children are involved in illegal activities, or in work that exposes them to physical, sexual or psychological abuse. However, not all work done by children is classified as child labor that should be eliminated. Work that does not affect children's health and personal development or interfere with their schooling can be constructive. This includes activities such as helping parents around the home, helping in a family business or earning pocket money outside school time. Whether or not work being carried out by children constitutes child labor depends on the child's age, the type and hours of work performed, and the impact of the work on the child's health, development and access to education. In addition to determining whether there are child laborers working at the facility premises, the possibility of workers taking work home should be monitored. If work is performed outside the facility premises, determine whether underage family members are doing it. Applicable legal standards include: ILO Core Conventions, C138 Minimum Age Convention, 1973 and C182 Worst Forms of Child Labour Convention, 1999, which provide the baseline standards for child labor; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements. Other relevant ILO documents: R146 Minimum Age Recommendation, 1973; R190 Worst Forms of Child Labour Recommendation, 1999

Forced Labor		
Sub-Section Instructions		
	<p>Overall International Labor Standard Compliance Guidance: Forced labor is work exacted under the menace of penalty and for which the person has not offered him/herself voluntarily. Forced labor violates the basic human right to work in freedom and freely choose one's work. Two elements must be present in addition to labor, which refers to all types of work, service and employment, whether formal or informal, regardless of industry or sector. Labour does not include compulsory education or compulsory vocational training, however, trainings required in connection with employment would be considered labor. 1) The first element is that the worker must be subject to threat of penalty. Look for coercion on the part of the employer (e.g., action taken to control, manipulate, deceive and/or override a person's will). However, bear in mind that for vulnerable workers, a relatively small amount of coercion may lead to forced labor. For example, workers who are migrants, pregnant or from ethnic minorities often are vulnerable and therefore may be more susceptible to forced labor. Some possible examples of penalties that could be imposed or threatened include: • Beatings, torture or sexual assault; • Restrictions on freedom of movement, e.g., prohibiting workers from leaving the workplace or living accommodation; • Financial penalties, e.g., burdening workers with unmanageable debt or delaying wage payments to keep workers on the job; • Reporting workers to the authorities (police, immigration, etc.); • Deportation, for example in the case of migrants in irregular situations; • Denying workers access to their personal documents; • Termination or exclusion from future employment; • Exclusion from community and social life; • Refusal of food, shelter or other necessities; • Transfer to worse working conditions, and • Removal of rights or privileges. Coercion is an indicator of forced labor regardless of whether it occurs during regular hours or overtime. Subjecting workers to the coercive tactics listed below under the Coercion compliance point would be an indicator of forced labor, even if the tactics are used solely to force workers to work overtime. In a limited set of circumstances, forced labor also can arise when workers are forced to work overtime through economic coercion. The Forced Labour and Overtime compliance point addresses those situations. 2) The second element of forced labor is that the worker has not accepted the work voluntarily. Workers must freely consent to accept the work and they must be free to leave the job and the workplace at all times. Deciding whether work is performed voluntarily often involves looking at • the vulnerability of the worker and • external and indirect pressures that make it difficult for workers to choose not to work, for example, non-payment of wages, or denying workers access to their identity documents. Applicable legal standards include: ILO Core Conventions, C29 Forced Labour Convention, 1930 (and Protocol), and C105 Abolition of Forced Labour Convention, 1957, which provide the baseline standards for forced labor; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements Other relevant ILO documents: C181 Private Employment Agencies Convention, 1997 and C1 Hours of Work (Industry) Convention, 1919</p>

Discrimination

Sub-Section Instructions

	<p>Overall International Labor Standard Compliance Guidance: Discrimination includes any distinction based on race, color, sex, religion, political opinion, national extraction or social origin, which results in unequal treatment. Other grounds of discrimination may be included in national law, such as disability, HIV/AIDS status, age and sexual orientation. Discrimination may be direct or indirect and does not have to be intentional. Indirect discrimination refers to apparently neutral practices, which in fact result in unequal treatment of people with certain characteristics. Distinctions are permissible when they are necessary because of the inherent requirements of the particular job, although this exception is rare. Also, measures to protect certain categories of workers are acceptable when they are provided for under international labor Conventions and Recommendations, such as maternity protection. Distinctions also may be permissible under national laws designed to help groups who need special protection, for example, laws that offer preferential treatment to women in hiring in order to remedy the effects of past discrimination. Applicable legal standards include: ILO Core Conventions, C100 Equal Remuneration Convention, 1951 and C111 Discrimination (Employment and Occupation) Convention, 1958, which provide the baseline standards for discrimination; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements. Other relevant ILO documents: R90 Equal Remuneration Recommendation, 1951; R111 Discrimination (Employment and Occupation) Recommendation, 1958; C156 Workers with Family Responsibilities Convention, 1981; R165 Workers with Family Responsibilities Recommendation, 1981</p>

Working Hours		
Sub-Section Instructions		
	Working hours refers to hours worked in an activity during normal periods of work, plus overtime, time spent at the place of work, when the worker is at the disposal of the employer. Working Hours are a fundamental component to the employment process and limitations (legal or otherwise) should be respected. For industrial enterprises, international standards limit regular (pre-overtime) working hours to 8 hours each day, 48 hours each week, subject to certain exceptions. They also say that workers must have at least one day off in seven. The sub-section below includes questions on items such as working hour records, regular and overtime hours, breaks, and rest days.

Forced Labor		
Sub-Section Instructions		
	<p>Overall International Labor Standard Compliance Guidance: Forced labor is work exacted under the menace of penalty and for which the person has not offered him/herself voluntarily. Forced labor violates the basic human right to work in freedom and freely choose one's work. Two elements must be present in addition to labor, which refers to all types of work, service and employment, whether formal or informal, regardless of industry or sector. Labour does not include compulsory education or compulsory vocational training, however, trainings required in connection with employment would be considered labor. 1) The first element is that the worker must be subject to threat of penalty. Look for coercion on the part of the employer (e.g., action taken to control, manipulate, deceive and/or override a person's will). However, bear in mind that for vulnerable workers, a relatively small amount of coercion may lead to forced labor. For example, workers who are migrants, pregnant or from ethnic minorities often are vulnerable and therefore may be more susceptible to forced labor. Some possible examples of penalties that could be imposed or threatened include: • Beatings, torture or sexual assault; • Restrictions on freedom of movement, e.g., prohibiting workers from leaving the workplace or living accommodation; • Financial penalties, e.g., burdening workers with unmanageable debt or delaying wage payments to keep workers on the job; • Reporting workers to the authorities (police, immigration, etc.); • Deportation, for example in the case of migrants in irregular situations; • Denying workers access to their personal documents; • Termination or exclusion from future employment; • Exclusion from community and social life; • Refusal of food, shelter or other necessities; • Transfer to worse working conditions, and • Removal of rights or privileges. Coercion is an indicator of forced labor regardless of whether it occurs during regular hours or overtime. Subjecting workers to the coercive tactics listed below under the Coercion compliance point would be an indicator of forced labor, even if the tactics were used solely to force workers to work overtime. In a limited set of circumstances, forced labor also can arise when workers are forced to work overtime through economic coercion. The Forced Labour and Overtime compliance point addresses those situations. 2) The second element of forced labor is that the worker has not accepted the work voluntarily. Workers must freely consent to accept the work and they must be free to leave the job and the workplace at all times. Deciding whether work is performed voluntarily often involves looking at • the vulnerability of the worker and • external and indirect pressures that make it difficult for workers to choose not to work, for example, non-payment of wages, or denying workers access to their identity documents. Applicable legal standards include the ILO Core Conventions, C29 Forced Labour Convention, 1930 (and Protocol), and C105 Abolition of Forced Labour Convention, 1957, which provide the baseline standards for forced labor; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements. Other relevant ILO documents: C181 Private Employment Agencies Convention, 1997 and C1 Hours of Work (Industry) Convention, 1919</p>

Section Instructions		
Section Instructions		
	Section Description: The purpose of the Worker Treatment section is to understand how the facility treats workers while they are in the facility. From freedom of movement to harassment, this section seeks to understand if workers are treated in a fair and responsible manner, in line with applicable legal standards. Social and Labor topics within this section include: • Forced Labor • Harassment and Abuse • Discrimination • Discipline • Facility Comments	
Forced Labor		
Sub-Section Instructions		
	Overall International Labor Standard Compliance Guidance: Forced labor is work exacted under the menace of penalty and for which the person has not offered him/herself voluntarily. Forced labor violates the basic human right to work in freedom and freely choose one's work. Two elements must be present in addition to labor, which refers to all types of work, service and employment, whether formal or informal, regardless of industry or sector. Labour does not include compulsory education or compulsory vocational training, however, trainings required in connection with employment would be considered labor. 1) The first element is that the worker must be subject to threat of penalty. Look for coercion on the part of the employer (e.g., action taken to control, manipulate, deceive and/or override a person's will). However, bear in mind that for vulnerable workers, a relatively small amount of coercion may lead to forced labor. For example, workers who are migrants, pregnant or from ethnic minorities often are vulnerable and therefore may be more susceptible to forced labor. Some possible examples of penalties that could be imposed or threatened include: • Beatings, torture or sexual assault; • Restrictions on freedom of movement, e.g., prohibiting workers from leaving the workplace or living accommodation; • Financial penalties, e.g., burdening workers with unmanageable debt or delaying wage payments to keep workers on the job; • Reporting workers to the authorities (police, immigration, etc.); • Deportation, for example in the case of migrants in irregular situations; • Denying workers access to their personal documents; • Termination or exclusion from future employment; • Exclusion from community and social life; • Refusal of food, shelter or other necessities; • Transfer to worse working conditions, and • Removal of rights or privileges. Coercion is an indicator of forced labor regardless of whether it occurs during regular hours or overtime. Subjecting workers to the coercive tactics listed below under the Coercion compliance point would be an indicator of forced labor, even if the tactics were used solely to force workers to work overtime. In a limited set of circumstances, forced labor also can arise when workers are forced to work overtime through economic coercion. The Forced Labour and Overtime compliance point addresses those situations. 2) The second element of forced labor is that the worker has not accepted the work voluntarily. Workers must freely consent to accept the work and they must be free to leave the job and the workplace at all times. Deciding whether work is performed voluntarily often involves looking at • the vulnerability of the worker and • external and indirect pressures that make it difficult for workers to choose not to work, for example, non-payment of wages, or denying workers access to their identity documents. Applicable legal standards include the ILO Core Conventions, C29 Forced Labour Convention, 1930 (and Protocol), and C105 Abolition of Forced Labour Convention, 1957, which provide the baseline standards for forced labor; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements. Other relevant ILO documents: C181 Private Employment Agencies Convention, 1997 and C1 Hours of Work (Industry) Convention, 1919

Discrimination		
Sub-Section Instructions		
	Overall International Labor Standard Compliance Guidance: Discrimination includes any distinction based on race, color, sex, religion, political opinion, national extraction or social origin, which results in unequal treatment. Other grounds of discrimination may be included in national law, such as disability, HIV/AIDS status, age and sexual orientation. Discrimination may be direct or indirect and does not have to be intentional. Indirect discrimination refers to apparently neutral practices, which in fact result in unequal treatment of people with certain characteristics. Distinctions are permissible when they are necessary because of the inherent requirements of the particular job, although this exception is rare. Also, measures to protect certain categories of workers are acceptable when they are provided for under international labor Conventions and Recommendations, such as maternity protection. Distinctions also may be permissible under national laws designed to help groups who need special protection, for example, laws that offer preferential treatment to women in hiring in order to remedy the effects of past discrimination. Applicable legal standards include the ILO Core Conventions, C100 Equal Remuneration Convention, 1951 and C111 Discrimination (Employment and Occupation) Convention, 1958, which provide the baseline standards for discrimination; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements. Section Instructions		
	Section Description: The purpose of the Worker Involvement section is to understand how the facility involves workers in the improvement process within the facility. From participation in Freedom of Association to Grievance systems, this section seeks to understand the facility's mechanisms in place to facilitate dialogue and action between management and workers. Social and Labor topics within this section include: <ul style="list-style-type: none"> • Freedom of Association and Collective Bargaining • Worker Representatives • Bipartite committee(s) • Grievance Systems • Worker Feedback • Facility Comments 	
FOA & CB		
Sub-Section Instructions		
	Overall International Labor Standard Compliance Guidance: Freedom of association means the right of workers to join together to create organizations (unions) that represent them. It also applies to employer organizations. Collective bargaining is the process of negotiation between unions and employers, usually on working conditions and terms of employment. Both are fundamental rights, and they are linked together. Without freedom of association, collective bargaining cannot work because the views of the workers cannot be properly represented. Workers themselves must be free to choose how they are to be represented, and employers must not interfere in this process. Applicable legal standards include the ILO Core Conventions, C87 Freedom of Association and Protection of the Right to Organize Convention, 1948; C98 Right to Organize and Collective Bargaining Convention 1949, which provide the baseline standards for freedom of association and collective bargaining; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements Other relevant ILO documents: C135 Workers' Representatives Convention, 1971; C154 Collective Bargaining Convention, 1981; R143 Workers' Representatives Recommendation, 1971; R163 Collective Bargaining Recommendation, 1981

TERMINATION		
Number	Question	Final Verified Response
Section Instructions		
Section Instructions		
	Section Description: The purpose of the Termination section is to understand the facility's social and labor practices in the final stages of employment. Termination is the voluntary or involuntary ending of the employment relationship. Termination is typically voluntary in cases of resignation or retirement and involuntary in cases of dismissal or layoffs. Social and Labor topics within this section include: <ul style="list-style-type: none"> • Forced Labor • Employment Practices • Discrimination • Facility Comments 	
Forced Labor		
Sub-Section Instructions		
	Overall International Labor Standard Compliance Guidance: Forced labor is work exacted under the menace of penalty and for which the person has not offered him/herself voluntarily. Forced labor violates the basic human right to work in freedom and freely choose one's work. Two elements must be present in addition to labor, which refers to all types of work, service and employment, whether formal or informal, regardless of industry or sector. Labour does not include compulsory education or compulsory vocational training, however, trainings required in connection with employment would be considered labor. 1) The first element is that the worker must be subject to threat of penalty. Look for coercion on the part of the employer (e.g., action taken to control, manipulate, deceive and/or override a person's will). However, bear in mind that for vulnerable workers, a relatively small amount of coercion may lead to forced labor. For example, workers who are migrants, pregnant or from ethnic minorities often are vulnerable and therefore may be more susceptible to forced labor. Some possible examples of penalties that could be imposed or threatened include: <ul style="list-style-type: none"> • Beatings, torture or sexual assault; • Restrictions on freedom of movement, e.g., prohibiting workers from leaving the workplace or living accommodation; • Financial penalties, e.g., burdening workers with unmanageable debt or delaying wage payments to keep workers on the job; • Reporting workers to the authorities (police, immigration, etc.); • Deportation, for example in the case of migrants in irregular situations; • Denying workers access to their personal documents; • Termination or exclusion from future employment; • Exclusion from community and social life; • Refusal of food, shelter or other necessities; • Transfer to worse working conditions, and • Removal of rights or privileges. Coercion is an indicator of forced labor regardless of whether it occurs during regular hours or overtime. Subjecting workers to the coercive tactics listed below under the Coercion compliance point would be an indicator of forced labor, even if the tactics were used solely to force workers to work overtime. In a limited set of circumstances, forced labor also can arise when workers are forced to work overtime through economic coercion. The Forced Labour and Overtime compliance point addresses those situations. 2) The second element of forced labor is that the worker has not accepted the work voluntarily. Workers must freely consent to accept the work and they must be free to leave the job and the workplace at all times. Deciding whether work is performed voluntarily often involves looking at <ul style="list-style-type: none"> • the vulnerability of the worker and • external and indirect pressures that make it difficult for workers to choose not to work, for example, non-payment of wages, or denying workers access to their identity documents. Applicable legal standards include the ILO Core Conventions, C29 Forced Labour Convention, 1930 (and Protocol), and C105 Abolition of Forced Labour Convention, 1957, which provide the baseline standards for forced labor; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements. Other relevant ILO documents: C181 Private Employment Agencies Convention, 1997 and C1 Hours of Work (Industry) Convention, 1919

Discrimination		
Sub-Section Instructions		
	Overall International Labor Standard Compliance Guidance: Discrimination includes any distinction based on race, color, sex, religion, political opinion, national extraction or social origin, which results in unequal treatment. Other grounds of discrimination may be included in national law, such as disability, HIV/AIDS status, age and sexual orientation. Discrimination may be direct or indirect and does not have to be intentional. Indirect discrimination refers to apparently neutral practices, which in fact result in unequal treatment of people with certain characteristics. Distinctions are permissible when they are necessary because of the inherent requirements of the particular job, although this exception is rare. Also, measures to protect certain categories of workers are acceptable when they are provided for under international labor Conventions and Recommendations, such as maternity protection. Distinctions also may be permissible under national laws designed to help groups who need special protection, for example, laws that offer preferential treatment to women in hiring in order to remedy the effects of past discrimination. Applicable legal standards include the ILO Core Conventions, C100 Equal Remuneration Convention, 1951 and C111 Discrimination (Employment and Occupation) Convention, 1958, which provide the baseline standards for discrimination; other conventions in force in the country; applicable legislation; Collective Bargaining Agreements and provisions in employment contracts that exceed legal requirements Other relevant ILO documents: R90 Equal Remuneration Recommendation, 1951; R111 Discrimination (Employment and Occupation) Recommendation, 1958; C156 Workers with Family Responsibilities Convention, 1981; R165 Workers with Family Responsibilities Recommendation, 1981

MANAGEMENT SYSTEMS		
Number	Question	Final Verified Response
Section Instructions		
Section Instructions		

Section Description: Management Systems related to Social and Labor practices are very facility dependent. They can take many forms depending upon a facility's size, worker demographics, production process and organizational maturity. However, despite their general differences, common themes can be found within most social management systems. With this in mind, the questions below represent an information gathering exercise on possible Social and Labor elements the facility might have based on a Plan, Do Check, Act "PDCA" structure. PDCA is framework for managing processes and systems and within this tool, covers the following items: "Plan" - Policies and Procedures / Strategy and Goals "Do" - Roles and Responsibility / Communication and Training "Check" - Self-Assessment "Act" - Continuous Improvement The questions listed below are simply a starting point to better understand the various aspects that might make up a facility's management system. Having - or not having - certain items in place is not in and of itself a direct reflection of the overall quality of the management system. As with other sections within this tool, answers simply offer an opportunity to further understand the facility's processes so that additional discussions outside of the tool with interested parties can take place. A note to the respondent: Many of the same social and labor topics mentioned in "Step 1" are also included in the questions below. "Step 1" questions primarily ask about whether certain items "exist" or certain actions "are taking place". While "Step 2" will determine if more formal management systems exist.
